

# 10 Things You Must Have in a Managed EDR Solution

Choosing the right Endpoint Detection and Response (EDR) service can be a critical decision for your business. The right solution can be difficult to choose. This checklist will help you compare and identify the key features that align with your business needs.

**24/7 SOC Monitoring**

Round-the-clock monitoring by a dedicated security operations (SOC) team.

**Rapid Incident Response**

Quick threat analysis and containment to minimise downtime and prevent further damage.

**False Positive Reduction**

Look for accurate alerts and low false positives, to help your team focus on real issues.

**Easy Deployment and Integration**

Easy deployment and integrates well with existing security tools without disrupting your operations.

**Excellent Visibility**

Near real-time visibility into endpoint activity, to quickly detect and deal with the potential threats.

**Clear, Actionable Alerts**

Straightforward alerts and actionable recommendations, so your team knows what steps to take.

**Tailored Protection**

Adapts to your environment to provide alerts and protection based on your specific needs.

**Expert Guidance**

Guidance from cybersecurity experts who can help your team understand and resolve threats.

**Scalability**

Easily scale to protect your network, regardless of your business's current or future size.

**Predictable Costs**

Transparent pricing and no hidden fees to maintain cost-effective security for your business.

Selecting an EDR service is crucial to staying ahead of cyber threats. Use this checklist to ensure you find a solution that offers proactive monitoring, seamless deployment, and expert guidance to protect your business now and into the future. Investing in the right EDR service means your organization is prepared to face cybersecurity challenges confidently.
